

## **AVI-SPL Selects Acuity-vct for innovative healthcare surveillance application.**

AVI-SPL which recently earned top honors, being judged as the #1 AV integrator by *Systems Contractor News (SCN)* has selected *Acuity-vct* for an innovative new surveillance application tailored to the healthcare industry.

This system called the Nurse Charge System (NCS) will allow nurses to view all hospital operating rooms in real time providing better efficiency in room and staff scheduling. The NCS will provide the nurse with one, and two way audio functionality to communicate the surgical staffs and determine the time left in each procedure to better schedule patient procedures.

“We are very excited that Acuity-vct has been selected to partner with AVI-SPL for their healthcare surveillance needs. AVI-SPL is ranked in the "Top 50" of integrators in the U.S. and Canada and our products selection validates our product advanced functions and cost effectiveness.”

### **Dan Lazuta – Director of Sales and Marketing**

The NCS can simultaneously monitor 50 or more operating rooms and will also allow doctors to view selected cameras from any network connected computer. Physicians will also be able to view selected cameras live from an Iphone to extend the systems capability. Additional functionality is planned to continually add to the benefits of the NCS product.
